SUMMARY

I am a devoted IT Security Analyst/Release Engineer skilled to tackle complicated problems with positive attitudes and no bias when working with the development teams. Utilized and enhanced the skills and techniques developed over my career in performing various projects. The overall completed tasks from my expertise, abilities, dependability and accomplishments made me a valued asset. Obtained exceptional skills in the following areas:

• ClearQuest	• Trac	• Toad	• Java	• LDAP/ADAM
• Subversion	• AirWatch	• Teradata	• Perl/C/C++	• LDIFDE/CSVDE
• TortoiseSVN	• Splunk	• PL/SQL Developer	• Unix/Linux	

WORK EXPERIENCE

Smart and Final Stores, LLC. – Commerce, CA.

2006 – Present

IT Security Analyst/Release Engineer

Analyze security logs using the Splunk tool on a daily basis. When required to investigate further detailed information, I would use Lansweeper, Symantec Endpoint Protection Manager, Palo Alto Logs and TippingPoint SMS Client. In addition, as a primary admin of Subversion and ClearQuest, performed releases in liaison with the release team as well as independently. Subversion tasks includes, not limited to, configuring user access, production environments and user systems. I am now administering over forty repositories. Also completed/assisted in the following:

- Analyze security events using the Splunk Enterprise tool on a daily basis.
- Created Splunk Reports and Dashboards for users.
- Email requests to Helpdesk to request the PC Admins to perform systems and user system clean ups.
- Created repositories for projects to meet SOX Audit requirements.
- Provided install logs for Auditors during Audit.
- Created How To documents for developers including the Software Configuration Management Plan.
- Administer user accesses for Subversion and ClearQuest
- Taught developers on how to use best practices for creating Subversion branches for releases.
- Taught developers on how to use commands and functions using the TortoiseSVN, SVN and ClearQuest tools.
- Stage and perform releases using the TortoiseSVN and SVN (In Unix/Linux Environments) tools.
- Performed Mobile .ipa releases using the AirWatch tool.
- Performed Database Object releases using custom scripts and the PL/SQL Developer tool.
- Configured system environments (Windows, Unix and Linux) for Subversion controlled elements.
- Create and maintain over forty Subversion repositories.
- Created and modified custom scripts to execute and log the installation processes on the Linux/Unix environment.
- Attend weekly Software Change Control Board meetings.
- In addition in attending the SCCB meetings, I had also leaded the meeting in the past when my manager could not attend.

QA Analyst – CTFL

Performed tests on various applications built on various platforms, such as, Mobile Devices (iPhone & iPad), .NET, Oracle, UNIX including the Mainframe system. Worked closely with various development teams on major projects and

determined which levels of test method to employ in order to meet the company's milestone and collecting required documents. Also completed/assisted in the following:

- Analyzed, tested, implemented, and improved software development process by utilizing accurate configuration items data in each of its releases; it reduced release cycle time by half of its original.
- Performed tests on financial systems with developers and users to meet the business requirements.
- Performed tests on the Mainframe system with the developer using Code Reviews and Unit Testing.
- Performed independent testing on the Portal using Test Cases provided by the developer using the Functional Area and Performance Testing methods to validate accuracy of the business sales reports.
- Performed tests on the Supply Chain/Store systems and hands on testing to meet the users and business needs.
- Performed tests on Mobile applications using the iPhone and iPad by ensuring the data displayed are accurate and viewable which provided users with confident when viewing sales reporting.
- Performed releases to QA and Production environments using Subversion tools on a timely manner to meet company milestones.
- Wrote queries to verify and compare data for tests using PL/SQL Developer, TOAD and Teradata tool, as a result, enhanced data integrity.

QS Coordinator

Utilized my problem solving skills to the extent in using the ClearQuest tool to manage Software Change Requests. The skills and knowledge that I have achieved from was the development life cycle and the release process with various IT development teams. Also completed/assisted in the following:

- Involved in all SQA activities to ensure all documents are provided and requirements meets the SQA Entrance and Exit Criteria.
- Administering and maintaining ClearQuest to accurately generate the current state of a bug fix/feature enhancement and the overall project evaluation for project managers/developers to better assist on their software development.
- Inherited responsibilities for all documentations on all Change Requests submitted to ClearQuest
- Made independent responsible mature decisions during critical times to meet the business needs
- Facilitated and generated reports for Change Management Control Board Meetings. Distributed the reports to the board which provided clear descriptions of the latest status and state of projects.

Access Request/LDAP Administrator

Ensure all requested access to applications meets the user's identity and business needs in a timely manner. Excel in team collaboration and solution brainstorming. Applying and maintaining a friendly service mentality is a must in order to satisfy all users' needs. The followings are additional information of my responsibilities and involvements:

- Utilized the company's API In House build Application called LDAP.
- Acquired the hands-on experience and knowledge working in a professional environment as a team member that allowed mental maturity and the highest respect for all aspects of the engineering field.
- Interacted with associates in all departments
- Constantly maintained a sturdy communication with Application Business Owners, Customers and Application Administrators
- Enforced all required policies to ensure all procedures meet auditing requirements
- Improved the Access Request Plans and Procedure documentation to clearly identify the Access Request's processes
- Involved in auditing reviews and provided all required documents
- Created Perl Scripts, Batch Files, LDIFDE & CSVDE to maintain the integrity of LDAP's data.
- Performed Quarterly and Semi-Annual internal audit reviews.

Systempro Computer Inc. - City of Industry, CA**2004 – 2006**Computer Technician

In this prominent diminutive company, I have enhanced my skills and knowledge of a simple computer. I have also assisted as a salesperson and a technician at most of the computer fair. This position requires a person with swift problem solving skills and must be versatile. The followings are the knowledge and skills that I have gained from and used for this company:

- Utilized my multitasking skills by building multiple computers while installing drivers and software on others
- Enhanced my skills and perception to a higher level of quality control
- Assembling a whole new robust computer from scratch
- Gained a better understanding of how does the computer hardware and software collaborated with each other
- Gained further knowledge of various computer part's features and functions
- Run tests on every new system to assure all drives are robust before releasing the system with a QA perspective
- Assisted on phone and human interaction with Tech Support when required
- Handled most of the Quality Control to insure a high quality computer system

MODCOMP Inc - Ft. Lauderdale, FL**1999 – 2000**Intern Software Engineer

Excel in team collaboration and solution brainstorming. Applied rigor and creativity that combines my knowledge that I've learned from school research; human-computer interaction, and graphic design to solve diverse GUI design issues.

- Utilized the company's API (Viewmax) to modernize the user interface
- Co-wrote programs and implemented them using HTML and JavaScript also assisted in minor Java Applications
- Implemented new GUI demos for both Pocket PC (using Web Clipping) and cellular phones (using WML and WMLScript) that enhanced salesperson to insure an error free environment when presenting the company's demo to vendors. Managed all phases of GUI for the interactive and transactional e-commerce site for the demo.
- Acquired the hands-on experience and knowledge working in a professional environment as a team member that allowed mental maturity and the highest respect for all aspects of the engineering field.

EDUCATION**B.S., Computer Engineering, Florida Atlantic University, Boca Raton, FL****December 14, 2001****CERTIFICATES AND TRAINING**

- Certified Tester, Foundation Level – 2010
- Certificate for Advanced Excel 2003 – 2011
- Certificate for Intermediate Excel 2003 – 2011
- Certificate for Intro. to Cyber Security – 2015
